

Backflow Protection Program

Warren County is committed to providing safe drinking water to all of its residents. In order to protect the public water supply and meet the Ohio Environmental Protection Agency requirements, Warren County Water and Sewer Department will take over administration of the backflow program for containment devices from the Warren County Combined Health District.

Nonresidential customers and residential customers with irrigation sprinkler systems will receive letters in the mail regarding annual testing of their backflow prevention device(s). Details regarding the backflow program can be found on our website or you email us at waterdept@co.warren.oh.us or call us at (513) 695-1377.
